

App compositions

Six apps, three patterns — pick the one closest to your use case.

apps/demo-react

Primary E2E target

AppShell over BrowserRuntime
URL view switcher
(single · dashboard · depth · ...)
Live ticking · showcase profile seed

apps/demo-configservice-react

Multi-user demo

AppShell over BrowserRuntime
Header user picker (dev1 / alice / bob)
scopedActiveProfileKey per user
ConfigBrowser via window.open popout

apps/markets-ui-react-reference

OpenFin shell

OpenFinRuntime when isOpenFin()
/platform/provider · /blotters/marketsgrid
/dataproviders · /config-browser
/workspace-setup · /rename-view-tab

apps/demo-apps/basic-starui-app

Minimal example

createMarketsGridLocalStorageStorage()
No AppShell · No ConfigService
StatusStrip + ConfigInspector read
the same localStorage bundle key

apps/demo-angular

Angular dock-manager demo

32 standalone widget components
DockManagerCoreComponent layouts
PrimeNG (ChromaDeskPreset)
Consumes only @starui/design-system today

apps/stomp-view-server

Dev-time data source

Node + ws on :8081
Synthetic FI snapshots (~20k rows)
/health · / metadata endpoints
Used by demo MarketsGrid blotters
